IMS Policy

Environmental

Our Commitment

HiddenCove, as a specialist IT, network, security and communications consultancy, shall, as far as is reasonably practicable, recognize aspects of our operations which impact on our surrounds and seek to minimize our environmental footprint.

HiddenCove will meet this commitment through the implementation of comprehensive ISO14001:2004 environmental management system. We will:

Establish measurable environmental performance objectives and targets to ensure continual improvement of our environmental performance;

Ensure compliance with the Environmental Regulations, Standards, Codes of Practice and the provisions of applicable Local, State and National legislative requirements and other standards which relate to our environmental aspects and impacts;

Utilise a systematic process for the identification, assessment and treatment of our environmental risks. We will regularly evaluate the effectiveness of our risk management processes;

Consult with employees, contractors, clients and other interested parties to ensure we meet our customer and the communities environmental needs and expectations;

Identify and provide the necessary information, instruction, supervision and education to enable all employees to effectively carry out their tasks in a manner which prevents minimizes our impact on the environment;

Address our significant environmental impacts during product and service planning and delivery by: considering energy consumption and packaging when sourcing goods, suppliers, energy providers and fleet; actively promoting recycling and waste minimisation practices; and by preventing pollution of the environment from normal, abnormal or emergency conditions by means of adequate operational controls and an emergency preparedness plan;

Provide sufficient and suitable resources to implement, maintain, monitor, review, audit and continually improve our Environmental Management System and Policies to ensure consistency with the requirements of AS/NZS ISO 14001:2004 and to ensure it remains relevant and appropriate to our business.
